From the Desk of the Principal

Respected dignitaries on the dais, invited guests, my teachers, colleagues, staff and students of Assam Medical College, I take this privilege to welcome you as we celebrate the auspicious occasion of 77th Foundation Day of our alma mater.

From chequered beginnings of the medical institute started by Dr John Berry White, our college stands erect serving the cause of humanity in the easternmost part of the country. Today as I look back on the year gone by, I would like to place before you some salient events and noteworthy achievements of the college.

(i) Infrastructure development:

At the foremost was the visit of our honourable Prime Minister to inaugurate Dibrugarh Cancer Centre situated within our college premises. This has been a boost to cancer care for not only upper Assam but also the neighbouring states of Nagaland and Arunachal Pradesh. Another infrastructure development has been a fully operational Casualty Department with dedicated laboratory, radiology and ultra-sound facilities. It

is already equipped with 2 OTs, ICU with 8 beds and CT facilities will be operational in another one month. It was a long felt need of the college to attain self sufficiency in emergency and trauma care under one roof. This was fulfilled by the CSR fund of BCPL, which is also supporting the college in establishment of skill laboratory under National Emergency Life Support (NELS), Govt of India.

The super speciality block has become fully functional with all the specialised services for patient care under one roof. It houses the 6 departments of Paediatric Surgery, Neurology, Neurosurgery, Cardiology, CTVS, Nephrology and Urology.

State Forensic Science Laboratory has been established which will serve the needs of the entire upper Assam and also neighbouring states.

A new 350 bedded hostel for boys became functional along with a vertical extension to New Girls' Hostel. These have mitigated the hostel accommodation challenges for both undergraduate and post graduate students.

As a part of our platinum jubilee celebrations, different alumni batches too contributed in the form of developmental projects for their beloved college. Clock tower, open stage, cultural and sports complex, amphitheatre, spectators' gallery, entrance gate, gymnasium, smart classrooms, e-library, outdoor sitting areas etc. are just a few of the many gifts from our magnanimous alumni.

(ii) Academics and research:

Till date 9686 MBBS graduates and 3136 MD/MS post graduates have qualified successfully and are serving in different parts of the state as well as abroad. The platinum jubilee year also witnessed the initiation of DM and MCh courses in Cardiology and Paediatric Surgery. Fellowship courses have also been granted by SSUHS, Guwahati in departments of Pathology, ENT, Orthopaedics and Paediatrics.

Dental College became fully functional with its independent building and new faculty recruitment. New paramedical degree courses like B Pharm, B Medical Tech were also started in the college, as granted by the university.

Our faculty and students have undertaken different research projects funded by ICMR, DBT, SSUHS and UGC. The Multi disciplinary Research Unit and the Genetic Laboratory also provide the material and manpower support for post graduate research activities.

Apart from the funded projects, the faculty and students also take up many academic research work on their own initiative and keep up the tempo of the continuous learning process.

(iii) Patient care:

The patient load in all the departments have seen increased numbers due to better road connectivity with the neighbouring states. The average daily attendance in the OPD was 1804, average daily admissions 193 and average bed occupancy rate was 91.72%

The central emergency laboratory services run 24x7 providing much needed support for the treatment and surgical management of the patients. There are satellite outdoor clinics in different urban slum areas of Dibrugarh for the health needs of vulnerable communities. These provide MCH services, health promotion services, NCD screening etc. Our health providers undergo various in-service trainings and workshops which keep them updated with newer skills for better patient care.

All the national health programs under NHM are fully implemented in Assam Medical College providing universal health coverage to one and all. Under the initiative of ICMR, the stroke van was activated last year which provides accessible early intervention, thus reducing the time to treat.

Integrated Rare Disease Registry has been started along with a full-fledged Hemophilia and Thalassemia Clinic with day care services.

The 1st human milk bank in entire north east India was initiated in the college which will provide succour to the pre-term and low birth weight babies.

(iv) Platinum Jubilee Year 2022:

Last year marked the platinum jubilee celebrations which had different events spread out through the year. 'Sahitya Utsav', 'Bohagi Utsav', 'Bhaona', All Assam Open Debate, Quiz and drama on Dr John Berry White were some of the highlights of the year long activities. Those events had whole hearted participation from the sister institutes within the college premises, be it the nursing college, the dental college, the pharmacy institute or the paramedical institute. The grand finale witnessed alumni from different parts of the world converging on the college grounds. The scientific exhibition, the batch wise open sessions and the evening cultural programs were much appreciated.

A commemorative postal stamp was released during the formal platinum jubilee meeting graced by honourable Chief Minister along with respected cabinet ministers and luminaries from the state. The process has started for smooth utilization of rupees 300 crores financial package announced by the honourable Chief Minister during that same visit on 3rd November, 2022. The architectural plan and layout for reconstruction of hostels and residential complexes within the campus has already been finalized. All the platinum jubilee events had active presence of alumni from all over the world and were also live streamed on Face book.

Platinum jubilee year also witnessed many supportive activities by BCPL, IOC and NRL under their CSR initiatives. Dr John Berry White Auditorium was restored and renovated with lighting and acoustic system, ambulances and electric three-wheelers for in-campus transportation and dust bin vehicle for waste collection etc were all done under CSR funds. The college was also provided with three critical care ambulances by benevolent donors and well wishers.

Jubilee Park with a walking track is the 2nd such facility in Dibrugarh which provides the much needed green zone in the campus along with outdoor gym area developed last year.

(v) Vision statement:

Assam Medical College has faced many challenges and withstood the tests of time. All of us associated with the institute, whether directly or indirectly; continue to strive hard to keep our flag fluttering high above all else. Raising of 46 Assam Medical Coy NCC after more than a decade in oblivion is one of the many initiatives for the all round character building of our students. There has been restructuring of the hostel culture and functioning for a conducive campus environment to nurture young minds.

We have a dream to model our institute as a centre of excellence in academics, research and patient care. It is our good fortune that JICA has committed to development of different departments of the college in a phase wise manner. On its road map is the Centre of Excellence for Rare Diseases and implementation of advanced technology in medical care like robotics surgery etc. This is a step forward in the realization of our vision for Assam Medical College. We have pledged to live by the platinum jubilee theme 'Care with compassion: Committed to excellence' and it is our mantra to achieve the ultimate goal. I believe that with team effort and continued support from the government and the civil society, this vision could be a reality.

I thank the august gathering here for joining us today on this momentous occasion and hope that you continue to guide us and support us on this journey.

Long Live Assam Medical College!!

(Sanjeeb Kakati)

A Report on PBCR Dibrugarh Upper Assam

Principal Investigator: Dr. Adity Sharma, Professor & Head, Dept. of Pathology, AMCH

Co-PI: Dr. Zarika Ahmed, Assistant Professor, Dept. of Pathology

The PBCR, covering the Dibrugarh district is one of the six demographic cancer registries established in 2003 to cover the geographical area of Dibrugarh district under NERCR (North East Cancer Registries) by the NCRP (ICMR). It was known as PBCR Dibrugarh at that time. In 2019 National Centre for Disease Informatics and Research sanctioned and allowed the expansion of PBCR to cover the districts of entire Upper Assam, viz Dibrugarh, Lakhimpur, Dhemaji, Tinsukia, Sivasagar with Charaideo, Jorhat with Majuli, Golaghat. After expansion PBCR Dibrugarh was renamed as PBCR Upper Assam Dibrugarh by NCDIR.

The Registry will complete 21 years of its successful operation in December, 2023.

Coverage area with population-PBCR Upper Assam Dibrugarh:

Districts	Population (2011 census)			Area (Sq Km)
	Male	Female	Total

Tinsukia	6,80,231	6,47,698	13,27,929	3,790
Total			76,92,728	21,706

The Registry Area:

There are 59 towns of which 26 are census towns and 21 outgrowths of towns and 7916 villages in the district. More than 80% of the populations of the districts are rural.

Method of Data Collection:

The registry collects cancer data from several sources situated within and outside the registry area. At present it has access to more than 365 sources of registration.

Broadly the sources can be classified as AMCH, other hospitals & nursing homes, pathological laboratories, imaging centres, cancer centres outside Dibrugarh and Birth & Death registration centres. All the information collected from these sources are kept strictly confidential and used only for research purpose. Registration of cases is not voluntary. It is done by active method in that Social Investigators personally visit the different sources and collect data on cancer cases either by interviewing the patients, attendants or from the medical records. Care has been taken not to have multiple entries of the same patient. After collecting the core information of incident cancer cases from all the collaborating and outstation sources, the cases are finally re-checked from the diagnostic and residential point of view. Suspected cases are deleted from subsequent analysis. Only those patients who have been living in the registry area for at least one year prior to the first diagnosis of cancer are registered. This is done to avoid registering cases from floating population. The third edition of the International Classification of Disease for Oncology (ICD-O) and the 10th revision of the International Classification of Disease (ICD-10) are used to code morphology and topography respectively. Data on cancer mortality are collected from the death registers and certificates maintained in the birth and death registers in the PHC's, CHC's of the district as well as in the Municipality Board Dibrugarh and Medical Record Department of AMCH. Death records at MRD and Nursing Homes are scrutinized for more information on causes of death. Cases, on whom, no additional information was obtained other than that available in the death certificate are registered as "Death Certificate Only" DCO.

Data processing:

Data on cancer incidence and mortality recorded in prescribed form developed by the Coordinating Unit, NCDIR are entered online. Checks are then undertaken for identifying data entry errors. After submission of complete data to the Coordinating Unit of NCRP, reports based on these data are published regularly by NCDIR.
