From the Desk of The Principal

Today on this auspicious day of 3rd November 2018, I on behalf of the entire family of Assam Medical College, extend my cordial welcome to our distinguished dignitaries, respected former teachers, present faculty members, Alumni, Staff, Students and all grade of workers of Assam Medical College that have gathered here in the Dr. John Berry White Auditorium to celebrate the 72nd Foundation Day of our beloved institute.

Seventy two years ago, on this auspicious day Assam Medical College was formally inaugurated by the then premier of Assam Late Lokapriya Gopinath Bordoloi by upgrading the existing Dr. John Berry White Medical School and the erstwhile army hospital at Barbari. We all must pay our most respectful homage to late Dr. John Berry White, the great visionary and philanthropist along with the other visionaries whose untiring effort, dedication and sacrifice had made it possible to bring a dream into reality.

Withstanding a lot of ups and downs, since its inception, the role of this pioneering institute for providing health care to the needy and poor patients, towards medical education and research is laudable. The Alumni of this institute have also been rendering excellent services not only in this country, but also in different parts of the world, making us proud.

It needs to be mentioned here that just a few years back, Assam Medical College with its old dilapidated buildings, inadequate manpower and lack of basic facilities was on the verge of de-recognition by Medical Council of India; but with the generous sanction of Rs. 100 crores from the Govt. of Assam, the revival of this institute became possible. Now

it is well equipped with all necessary infrastructural developments and modern OT, Wards, Laboratories and hostels etc.

The present Government has also sanctioned an amount of Rs. 100 crore under TNEIF for upgradation of this college within a period of three years. I express my sincere thanks and gratitude to our Hon'ble Chief Minister Sjt. Sarbananda Sonowal and Dr. Himanta Biswa Sarmah, Hon'ble Minister of Health and Family Welfare, Finance and PWD etc. for showing their keen interest, sincerity and perseverance for the development of the medical colleges of Assam.

Achievements :

1. Super Specialty Building : The construction of the Super Specialty building which was started on 3rd September 2016 is going to get its final touch by December' 2018.

2. The proposed area of construction of Dental College inside the AMC campus has been approved by Dental Council of India and 50 nos. of students of BDS course had started doing their classes from 4th September 2018. With the appointment of new members of faculty for the dental college the institute is going to get a new look.

3. The much awaited inauguration of the Mother and Child Health (MCH) building of AMCH was done by Sjt. Sarbananda Sonowal, Hon'ble Chief Minister of Assam in presence of Dr. Himanta Biswa Sarma, Hon'ble Minister of Health and Family Welfare, Finance and PWD etc. on 16th September 2018 and the unit had become functional since 22nd October 2018. It has given a great relief to the congestion in the Obst. & Gynae Department. The Hon'ble Chief Minister had also laid the foundation stone of the proposed Government Dental College, Dibrugarh on the same day in a ceremonial function at Dr. John Berry White Auditorium of AMCH in presence of Hon'ble MLAs of Dibrugarh and adjacent districts, high profile govt. officials, persons from district administration and august gathering that included members of faculties of AMCH, students, nurses, Asha Karmies and reputed citizens of Dibrugarh District in addition to general public.

4. Dr. Himanta Biswa Sarma, Hon'ble Minister of Health and Family Welfare, Finance, PWD etc. had declared in the said meeting about his vision for construction of multistoried building with all modern facilities in place of the present old Assam Type Buildings so as to give a new look to the college. He also had given consent for re-construction of our existing Dr. John Berry White Auditorium with modern technology like making it centrally Air Conditioned and Hitech Acoustic System etc.

5. The bunker that was constructed to house the Linear Accelerator has been approved by TATA Trust and the trust has given the consent for granting the Linear Accelerator to the Department of Radiology.

6. The main roads inside the AMC campus have been re-constructed recently and the official grant required for repair & renovation of all the existing by lanes of AMC campus have also been completed. The works for this project will start soon. This would definitely fulfill a long standing demand of the people of this area.

7. Almost all the street lights of AMC campus have been given a new look by replacing the old conventional bulbs by LED fittings. Likewise most of the conventional illuminating system inside the hospital wards have been replaced by modern LED fittings.

8. AMRIT Pharmacy” which is located in the old Casualty building premises would start functioning in 24x7 manner very soon. Drugs are available at minimal price here.

9. An area in front of the old Post office was cleared from unauthorized occupants with the help of District Administration about 3 months back. The occupants were there for a period of about 54 years without any valid documents.

10. Likewise another big plot of land belonging to AMC near opposite side of AMBEDKAR BHAWAN at Graham Bazar was also cleared from unauthorized occupants about a month back.

11. Palliative care OPD would be operational very soon in General OPD complex of AMCH. It is hoped that this endeavour would give a substantial amount of comfort to the terminally ill patients suffering from different illness. PROTISRUTI a socio cultural NGO of Dibrugarh have been doing a hilarious job to help us.

Projects in pipeline :

□ The level II cancer hospital that was supposed to be constructed inside the AMC campus have been upgraded to Level-I Cancer Hospital by the great imitativeness of our Hon’ble Chief Minister and Hon’ble Minister of Health and family welfare of Assam.

□ The land for the proposed Level-I Cancer hospital has been identified inside AMC Campus and the construction would start soon. The TATA Trusts in collaboration with the govt. of Assam have come forward for this noble effort.

□ Another project to build up in Tertiary Care Cancer Centre (TCCC) under TCC Scheme of National Programme for Prevention & Control of Cancer, Diabetes, Cardio vascular diseases and Stroke (NPCDCS) has also been proposed and necessary preliminary works are in progress.

□ Though the Govt. has taken up steps for improvement of the College and inspite of all round development in infrastructure academic activities and patient care, the college has got some vital issues that are to be addressed by the Government. Some of them are –

□ No. of sanctioned Grade-III, Grade-IV, nursing posts at AMCH are proportionately

far less compared to the newly constructed medical college viz. Jorhat Medical College, Barpeta Medical College & Tezpur Medical College.

- Widening of the approach road and adequate space for parking outside the campus.
- State of the Art Convention Centre/Auditorium.

Academic and Research :

1. The undergraduate students (MBBS) and the postgraduate students of his institution have been showing good results in the recent years under Srimanta Sankaradeva University of Health Sciences

2. Number of faculties have also undertaken research works under INDIAN COUNCIL OF MEDICAL RESEARCH from other Central Govt. funds, DBT grant etc. At present about 30 nos. of different project works are going on in full swing.

I thank all of them and hope that they would never be exhausted by doing this type of productive work.

3. Few faculties have already been recognized as PhD guide in different medical subjects and some are in the pipeline. This is a great achievement quite a good number of students are pursuing Ph.D course in various subjects under those faculties

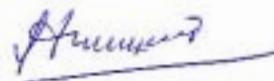

Other activities :

□ Our doctors have been engaged in various programmes of public health awareness apart from their regular duties in Assam Medical College, Dibrugarh. They have also participated in radio talks, interviews and visited other PHCs from time to time and have rendered their valuable services and helped in creating awareness within the mass.

□ The esteemed faculty members of the department of Psychiatry had visited many schools within the district for counseling the students of Adolescent age group so that they can lead their life in a desired way to become a good citizen of the country.

Finally, it would be unwise if I don't thank and acknowledge the co-operation, help and support that we have received from the District administration at times of our need and would also hope that the AMC would always maintain a cordial and fruitful relation with the administration for the years to come.

Long Live Assam Medical College.

Hospital Tumour Registry

at Assam Medical College & Hospital, Dibrugarh

The Hospital Tumour Registry was established at Assam Medical College Hospital, Dibrugarh in January 1982 under National Cancer Registry Programme by ICMR along with six other Hospital Based Registries at different parts of India. It has completed 36 years of successful operation on 1st Jan 2018.

The main objective of Hospital Registry, Dibrugarh is to assess the patterns of cancer patients reported in AMCH from North East India. During early 1980s AMCH was the only cancer therapy centre in the entire region of North Eastern part of India comprising the state Assam, Meghalaya, Nagaland, Manipur, Tripura, Mizoram and Arunachal Pradesh. These states comprise of more than 12 ethnic groups with various diversity in habitat and life style.

The major sources of data collection for registry are Radiotherapy OPD as well as all in patient wards of AMCH. All new cancer cases confirmed by microscopic, radiological or any other imaging techniques are collected for registration. Although case findings and data abstraction are not easy process in a general hospital devoid of specific cancer clinic as patients may attend any of various number of clinics in different departments of the hospital. During this operational period many more projects on cancer had been sanctioned by ICMR of which some have already been completed and some are still continuing. A Population Based Cancer Registry has been running since 2003 and Patterns of Care and Survival studies have been completed recently.

Annual review Meeting (ARM) of National Cancer Registry Programme (NCRP) which is now under NCDIR of ICMR was held at Kochi on 28th to 30th Nov, 2017. Dr. R. Akhtar (Research Officer) of HBCR presented the data for critical review. A three year report of HBCR for the period 2014-2016 was published.

During the year 2017, a total number of 1163 new cancer cases were registered. Among these, 480 male (41.3%) and 683 female (58.7%). the breakup of male female cancers reported in the individual years shows a gradual increase of female cancer cases.
